The AVeT team possesses an average of more than 15 years experience managing complex IT and agency mission challenges. Established to fulfill technology and contracting requirements for the U.S. Federal Government, agencies leverage AVeT's wealth of experience and expertise by applying these talents to implement technology, establish best practices, improve cost efficiencies, and enhance operational results.

At AVeT, our commitment to government is our people: individuals with experience-based knowledge, individuals who understand that persistence and attention to detail, coupled with the application of technology, are essential elements of success. These are people who have solved difficult problems, not merely studied them.

Specializing in project and program management, AVeT provides advisors to lead and assist those projects that must get done. Our associates pair real world experience with strong execution capabilities to enable our customers to achieve mission objectives.
